

CO3043 - Mobile App Development

Chapter 0

Introduction

MSc.Hoang Le Hai Thanh
High Performance Computing Lab - HCMUT

Today's Discussion

Outline of this Chapter

- 01 About Lecturer
- 02 Outcome
- 03 Contents
- 04 Course Details

About Lecturer

Hoang Le Hai Thanh (MSc)

- Researcher/Lecturer - High Performance Computing Laboratory (HPC Lab)
- Senior Mobile Developer - Viet Nam Blockchain Corporation (VBC)

Research Topics

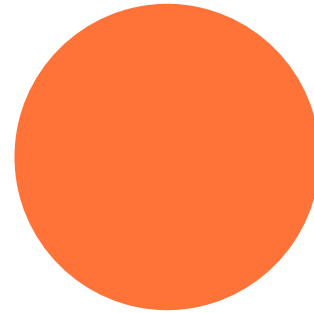

- HPC Job Smart Scheduling with Reinforcement Learning
- Big Data Analytics for Smart Village
- Project Management with Scrum/Agile
- ... and see more at hpcc.vn/careers

Contact

- Email: thanhhoang@hcmut.edu.vn (preferred)
- HPC Lab - 302B9 / 710H6 (Wed + Fri)

Learning Outcome

App Development not Programming

Mobile App Overview

Understand the different of app development between mobile and other platforms

Business Strategy

Identify app requirements and features that boost both user satisfaction and organization's business

Design Pattern

Implement current trends in designing a modern mobile app UI/UX with a reliable underlying architecture

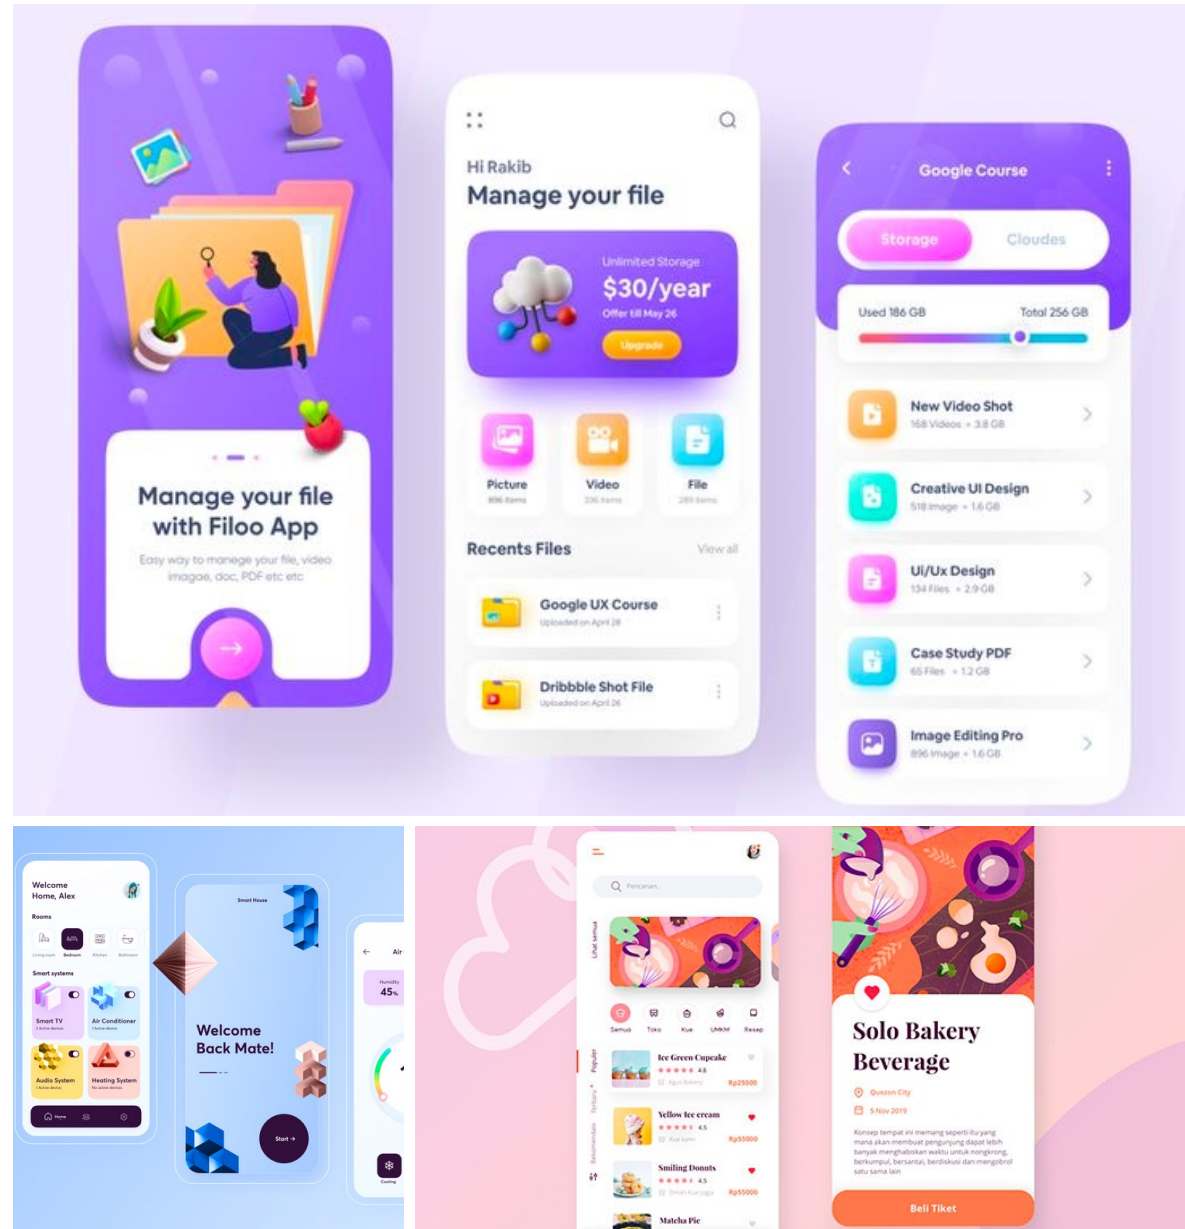

Deliverable Product

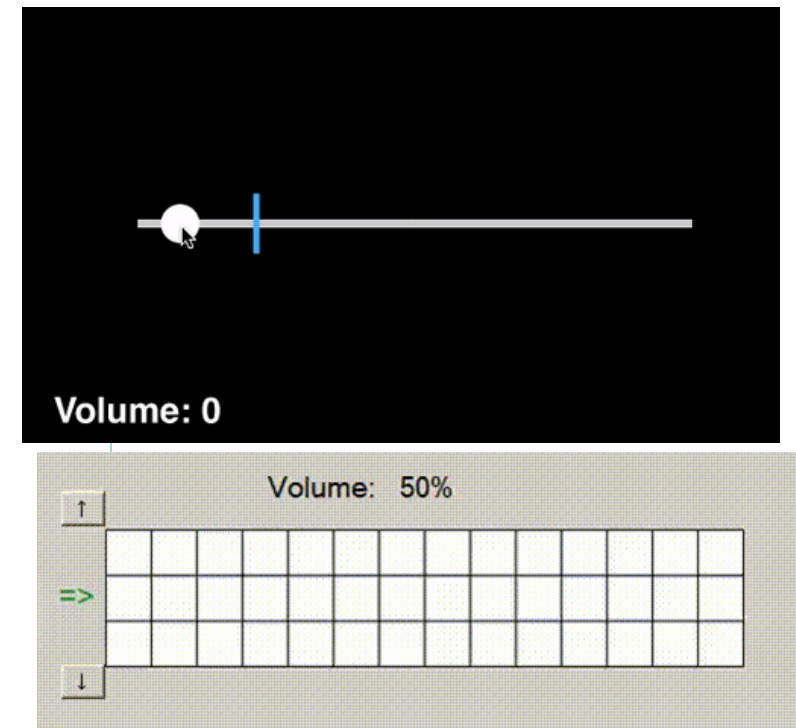

Examine techniques to release a mobile app to the customer via multiple channels with analytics and error logging

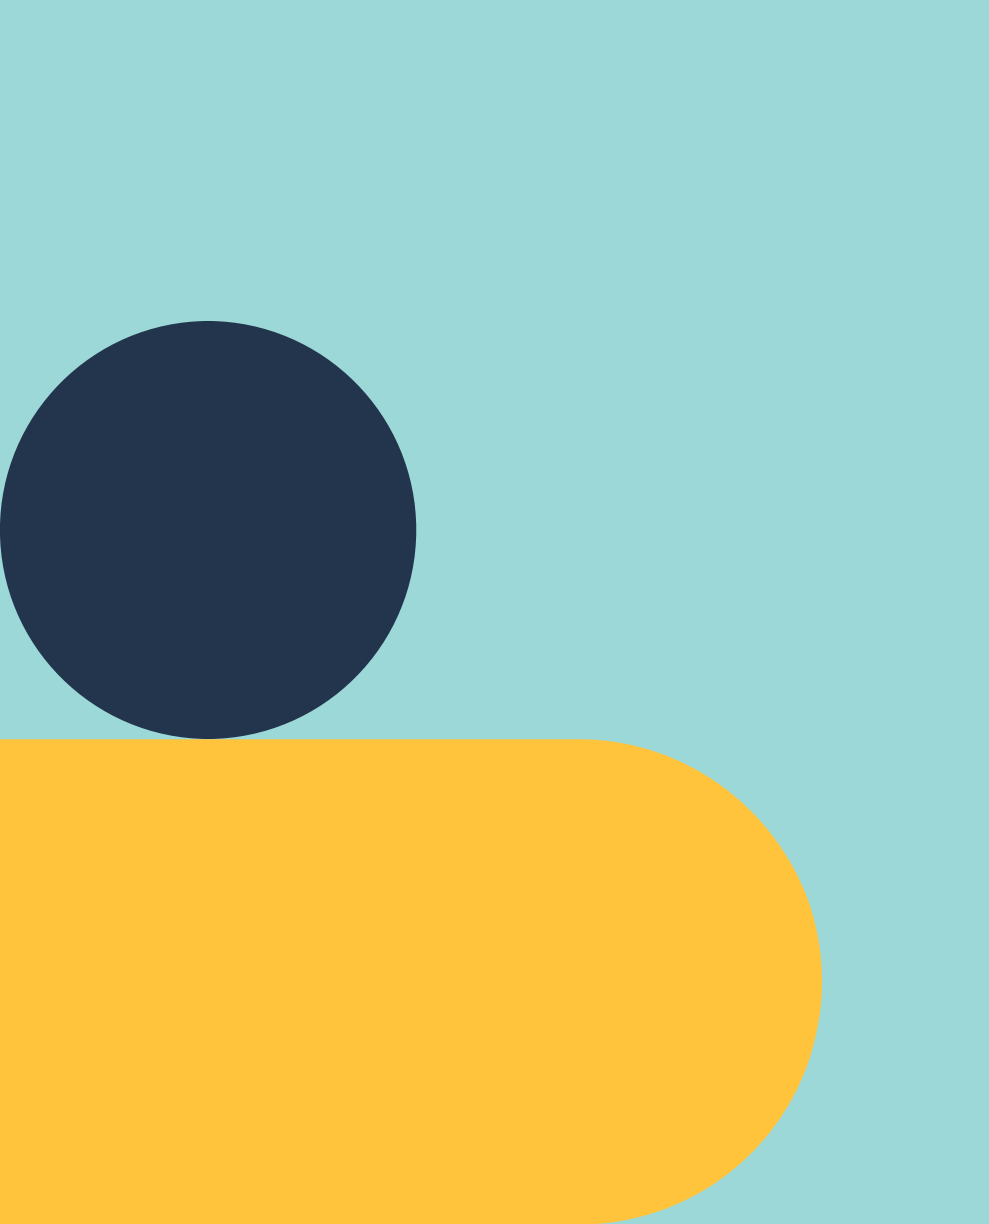

Deliver high quality mobile products

The technology stack can change day by day.

But fundamental skill sets are never outdated.

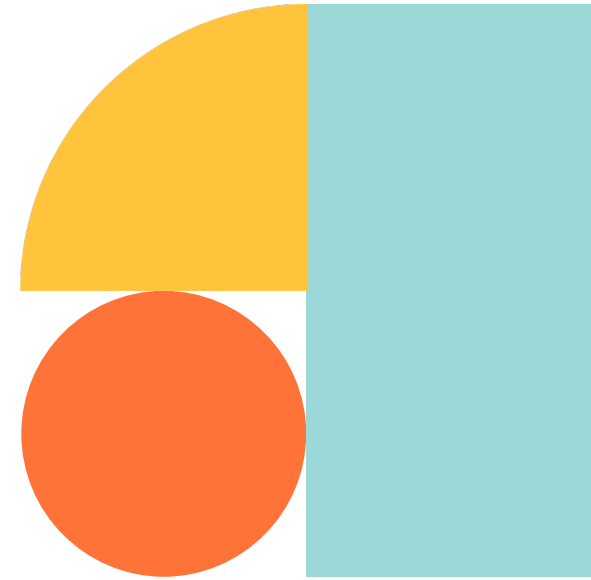

Course Contents

- Introduction to Mobile Application
- Business Strategy Evaluation
- Principle of UI/UX Design
- Modern System Architecture
- Multi-platform Development with React Native and Expo
- App Publishing and Maintenance

Course Requirements

Study this course with your own efforts

Prerequisites Courses

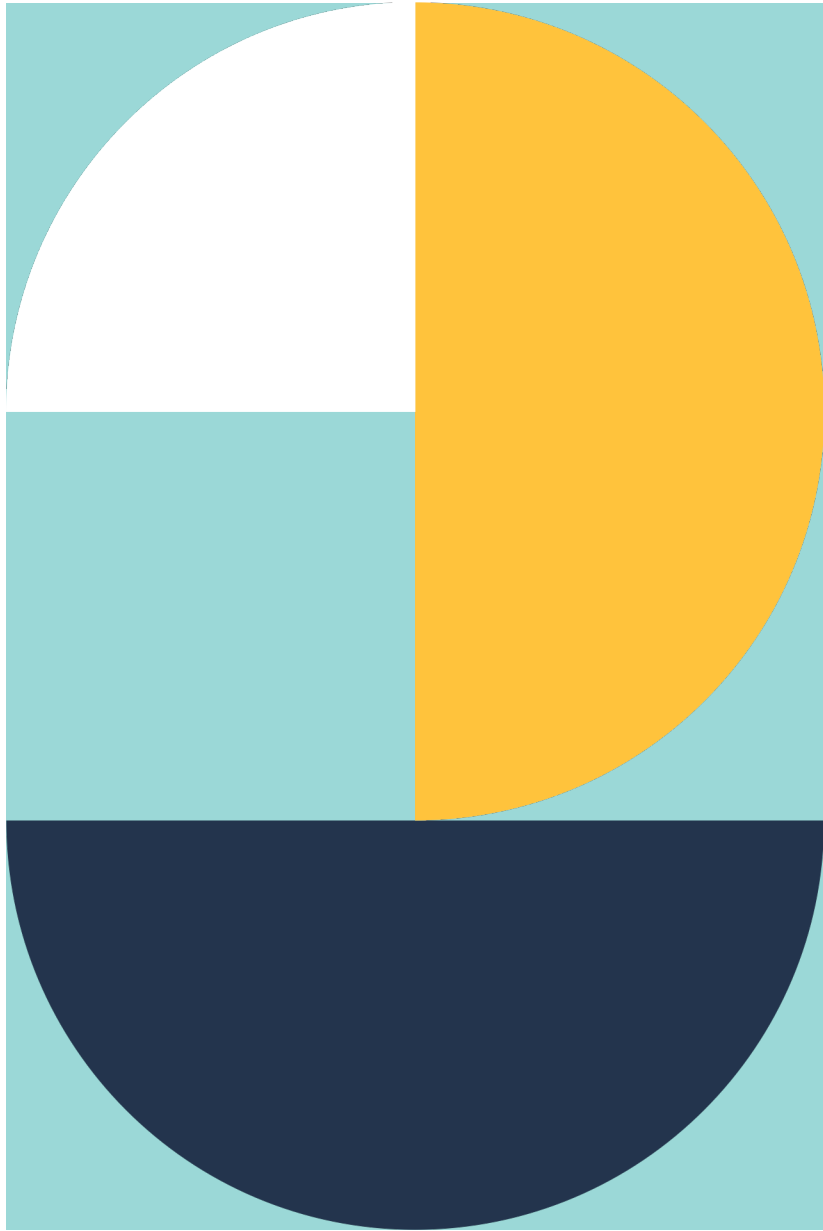

- Software Development Process
- Database
- Networking
- OOP
- Data Structure
- English

Compulsory Tasks

- Form a group of 4
- Complete all required Quiz on BKEL
- Finish Assignment
- Do not forget your final exam
- Study extra videos and research additional materials

Student Attitude

- Be active and effective
- Be clear and on time
- Inform lecturer in case of support
- Be happy, not crusty!
- Cheating is prohibited

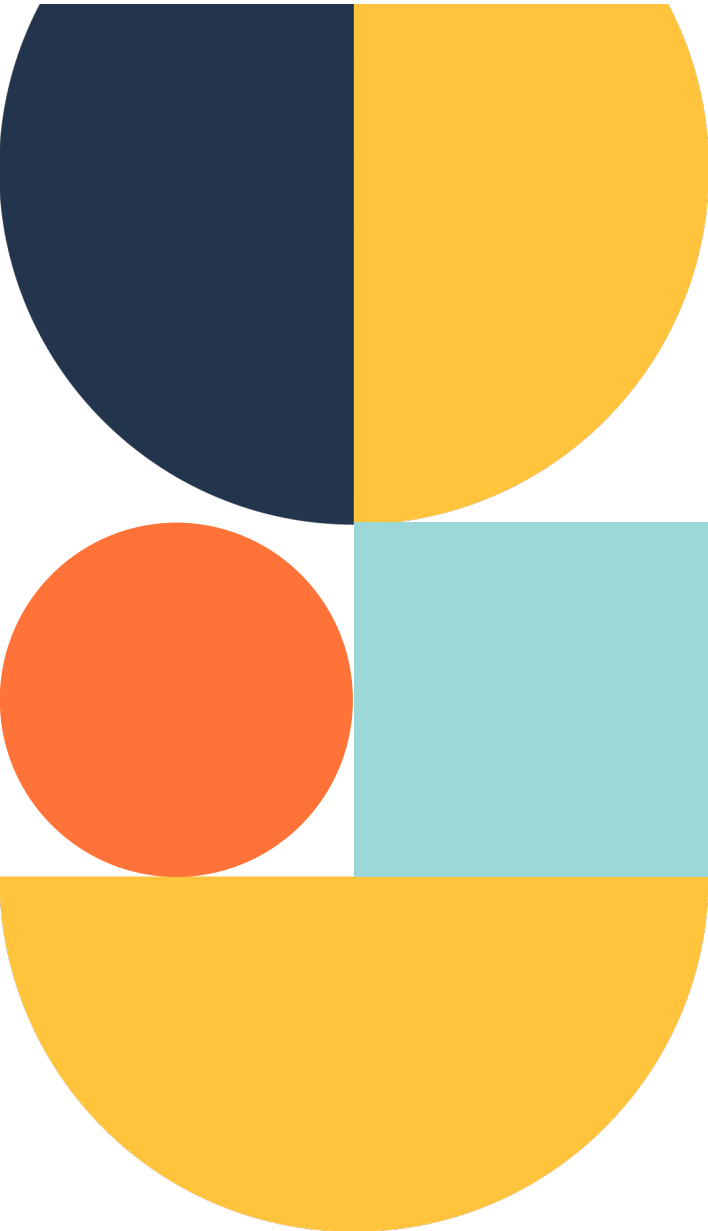

Technology Stack

Should I buy a Macbook?

React Native with Expo will be the main framework for this course. You need to prepare:

- Install NodeJS to your computer (with yarn).
- A GitHub account
- An expo.io account
- A Figma account
- A Smartphone with Expo Go installed

Course Timeline

12 weeks

This course uses the Blended method that reduces ~20% of total classes. Maybe some extra week for Assignment presentation and Revision

1 hour for Theory, 1 hour for Tutorial

The tutorial session:

- Each group will consecutively host a session with a provided technical topic
- Help other groups complete their in-class exercise
- Detail will be announced soon

In-class Exercise

- Research and Implement some aspects of the Assignment
- Need to work in a group
- Laptop is required
- Submit to BKEL

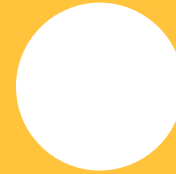

Course Assessment

60%

Assignment (40%) +
Quiz (10%) + In Class Exercise (10%)

40%

Final Exam (Multichoice)

Assignment

Develop a mobile app that can manage a rooming house

Assignment detail will be provided next week (and started)

Business Evaluation

1 month

Identify project requirements and business strategies

UI/UX Design

1 months

Create a runnable product demo

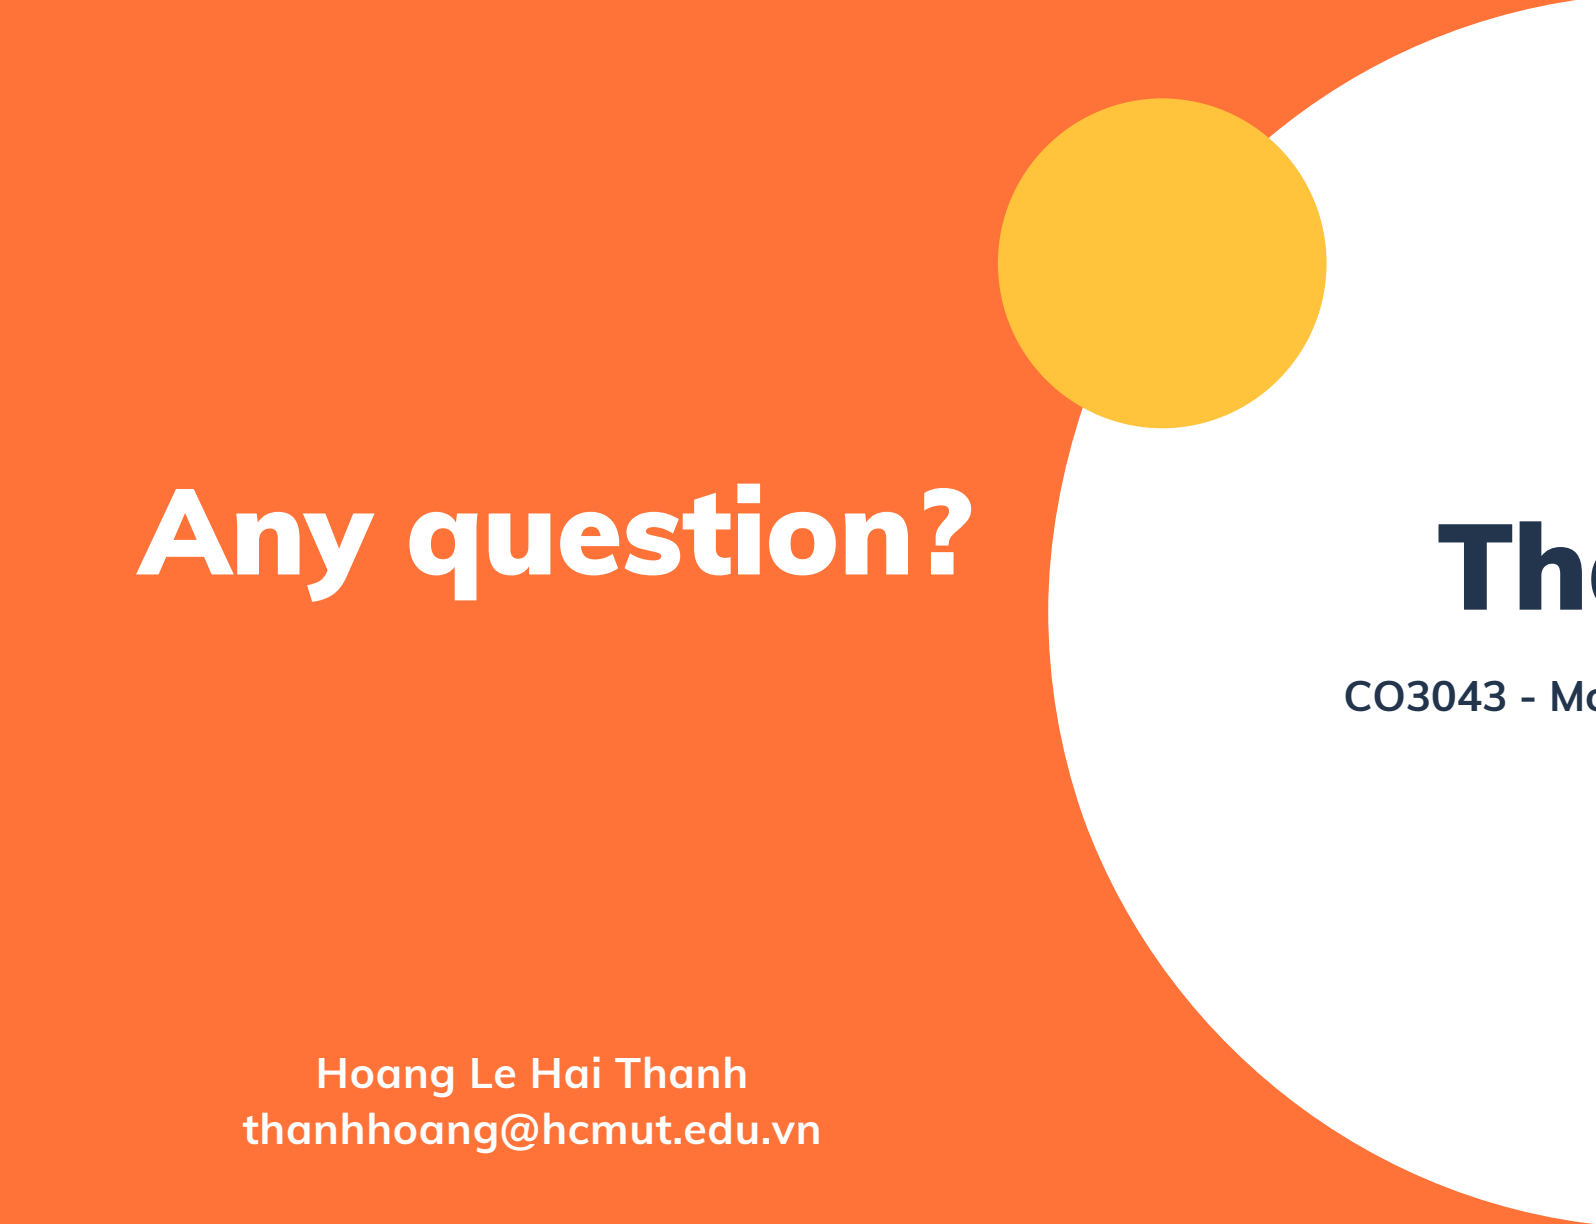

Publishing

2 months

Deploy an executable product and gather feedbacks from users

Any question?
