Best Practices and Tips

01

User Interface Design Basics

The user interface (UI) is the point at which human users interact with a computer, website, or mobile application.

UI Elements

Input Controls

UI elements that enable users to input information

Navigation Components

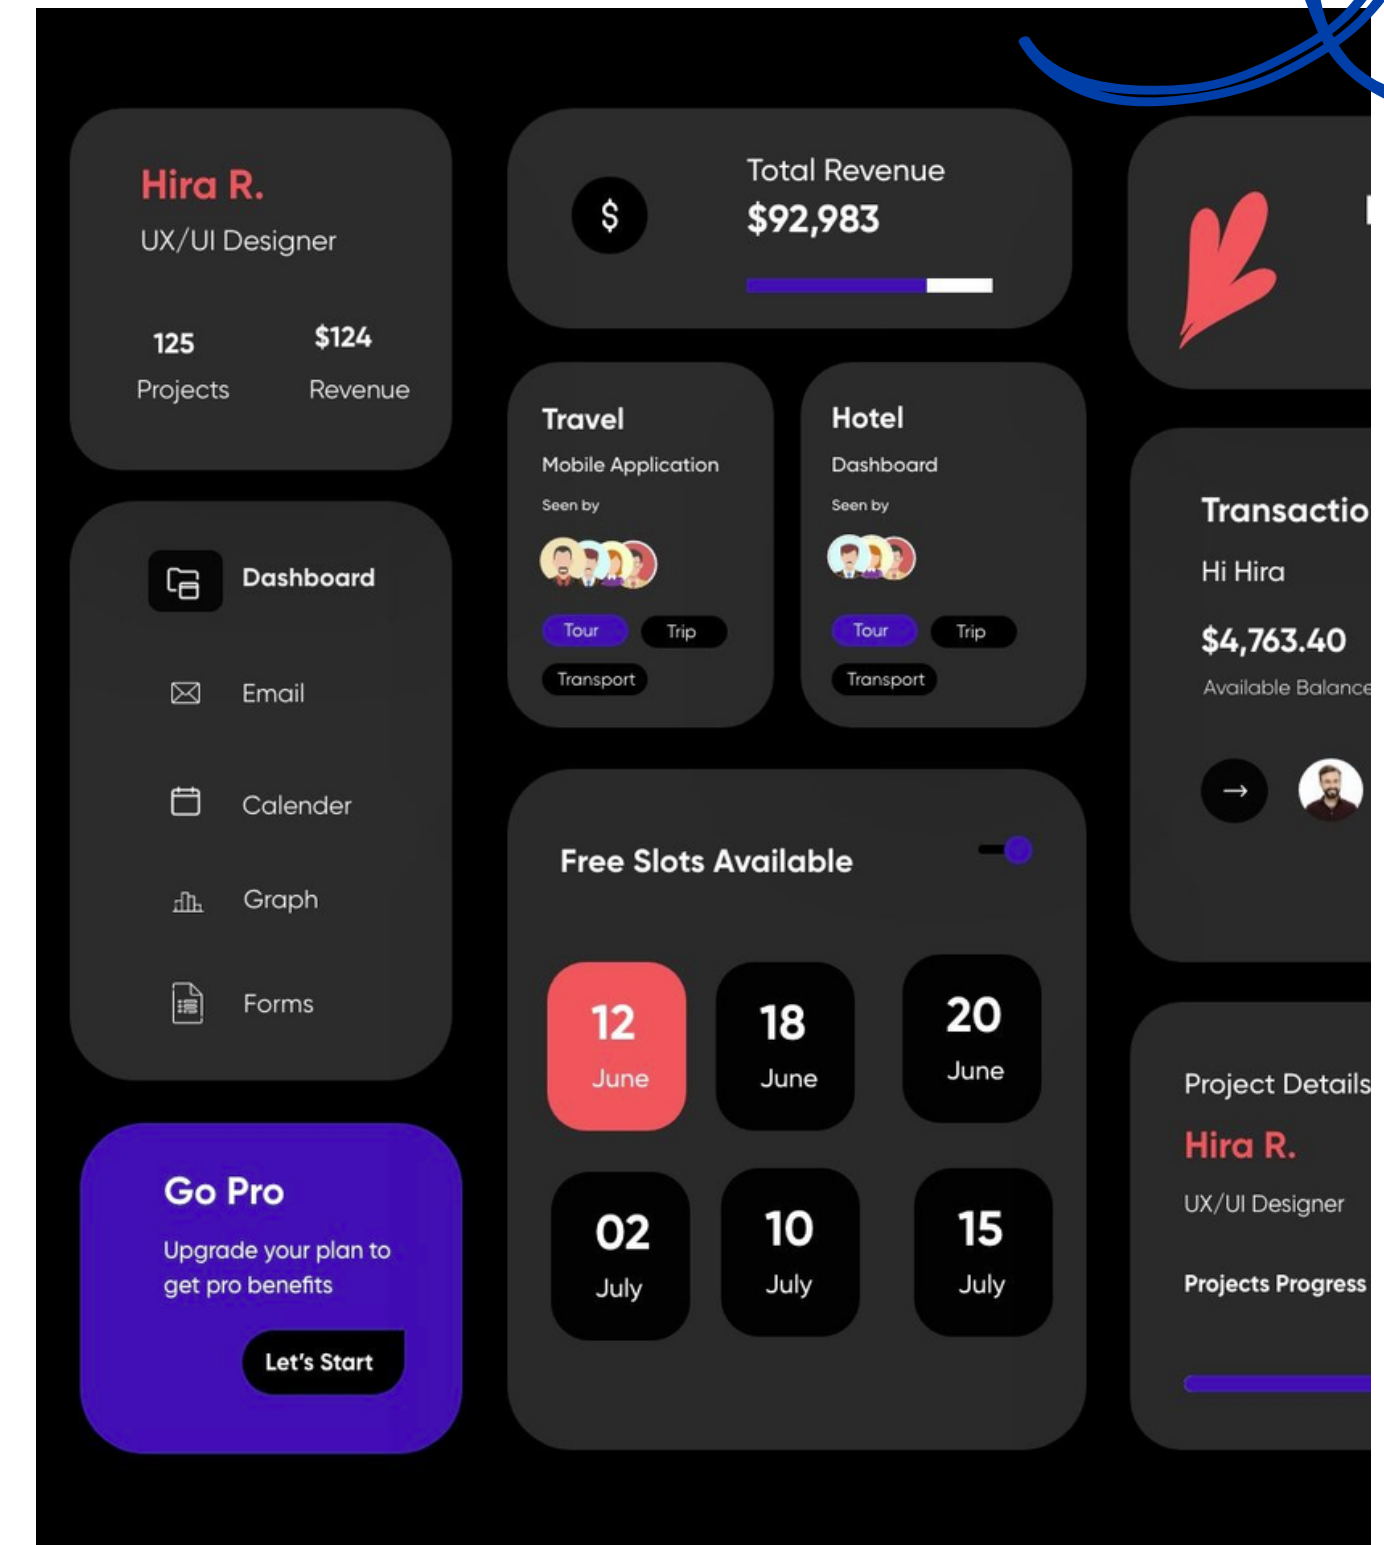

UI components that can make it easy to navigate through a mobile app.

Information Components

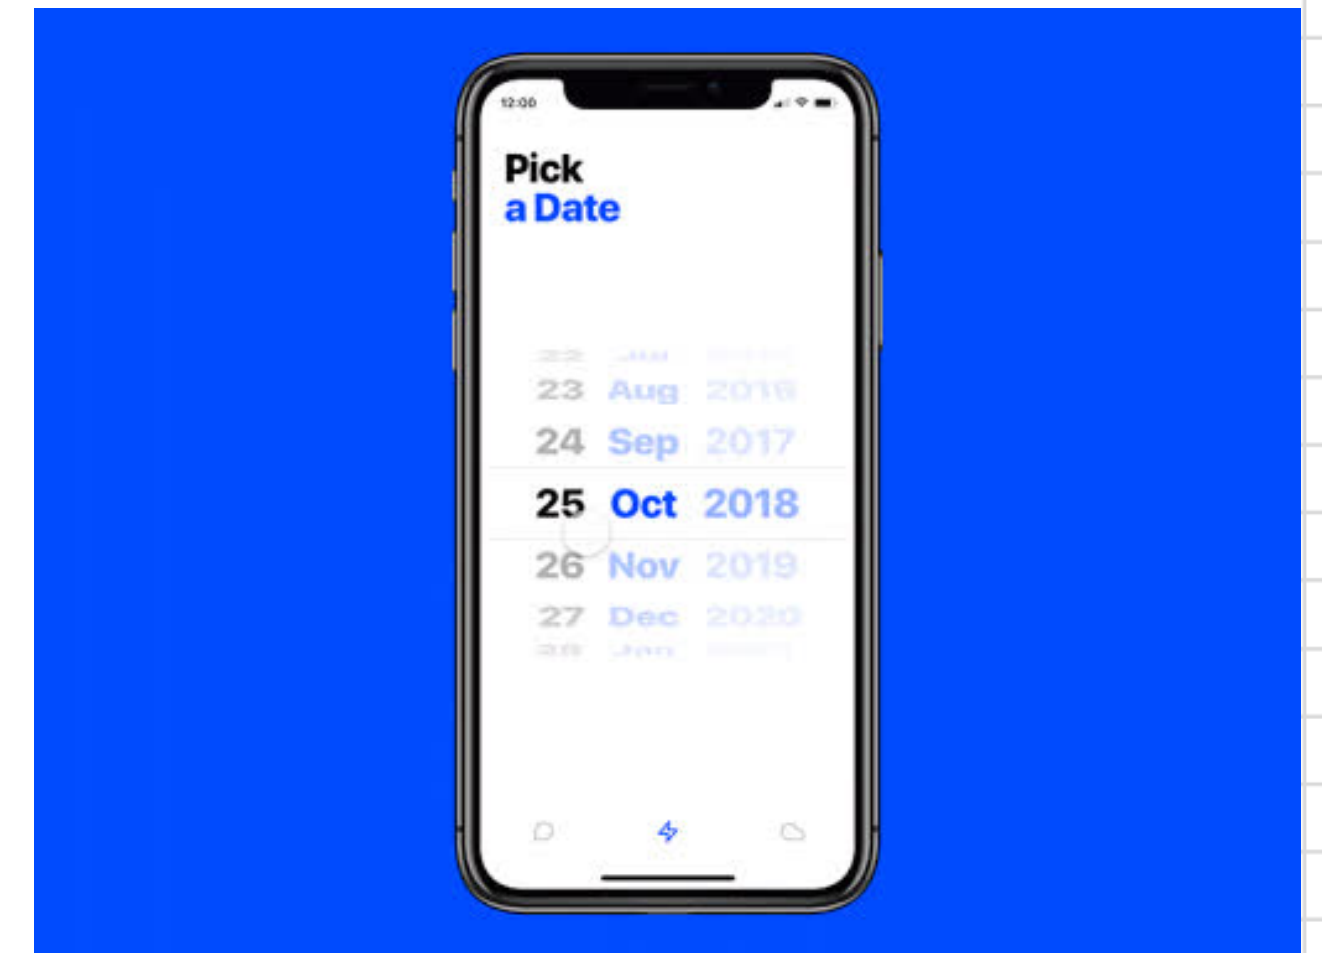

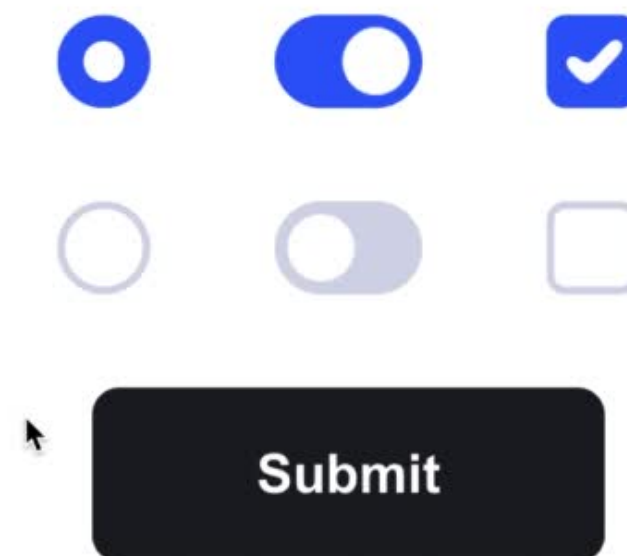

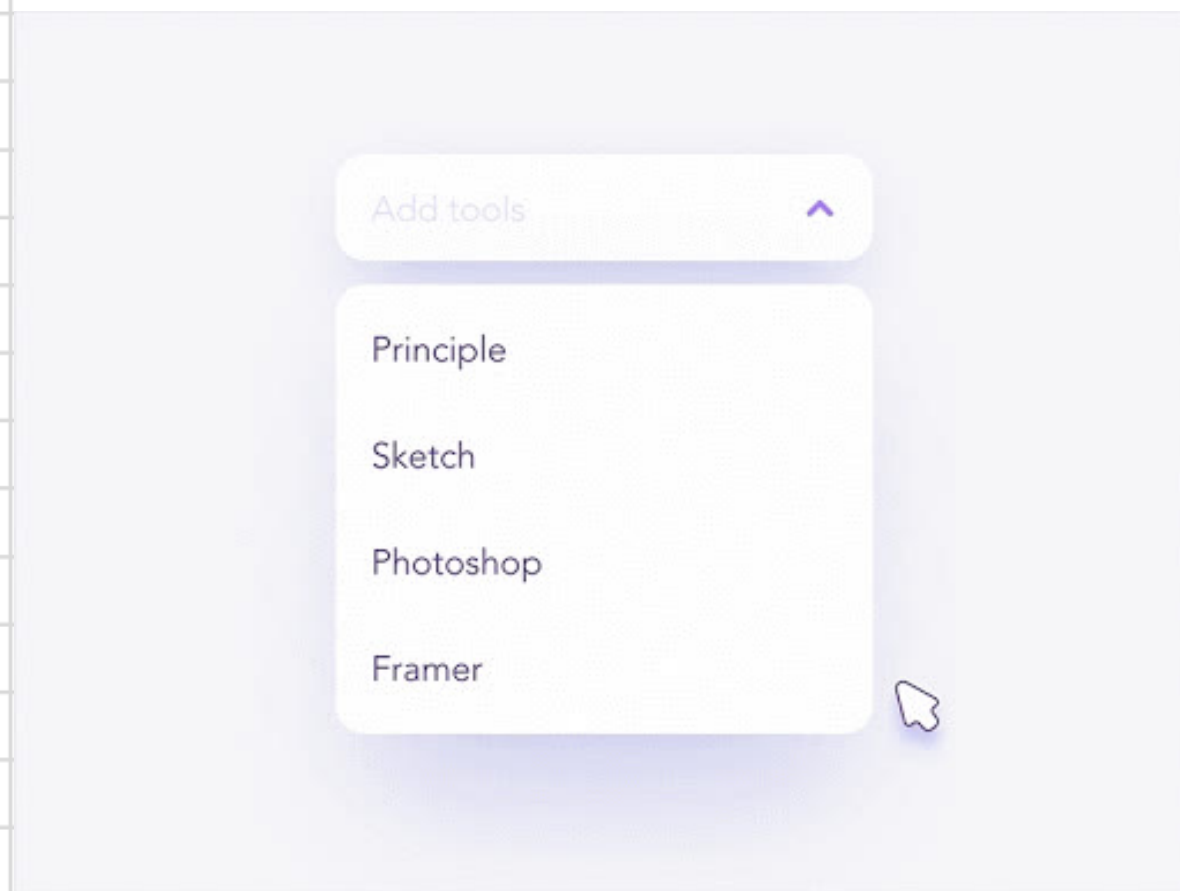

UI components that help share information with users

Containers

UI components that can hold together a full set of components and content that are related to each other

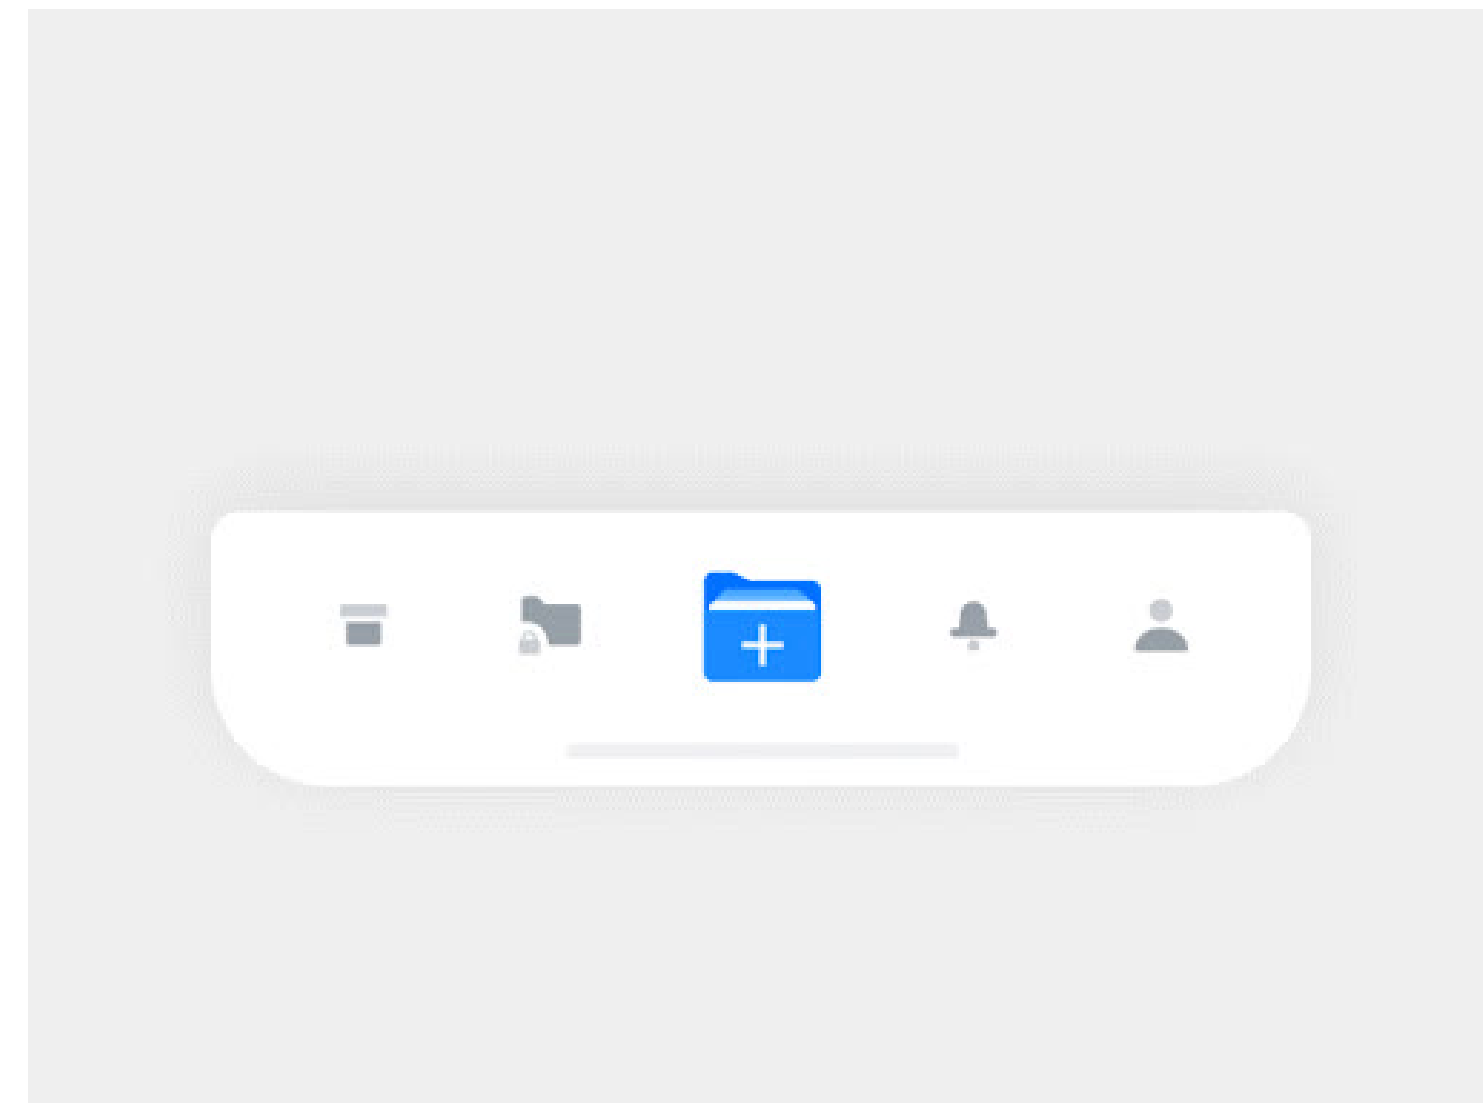

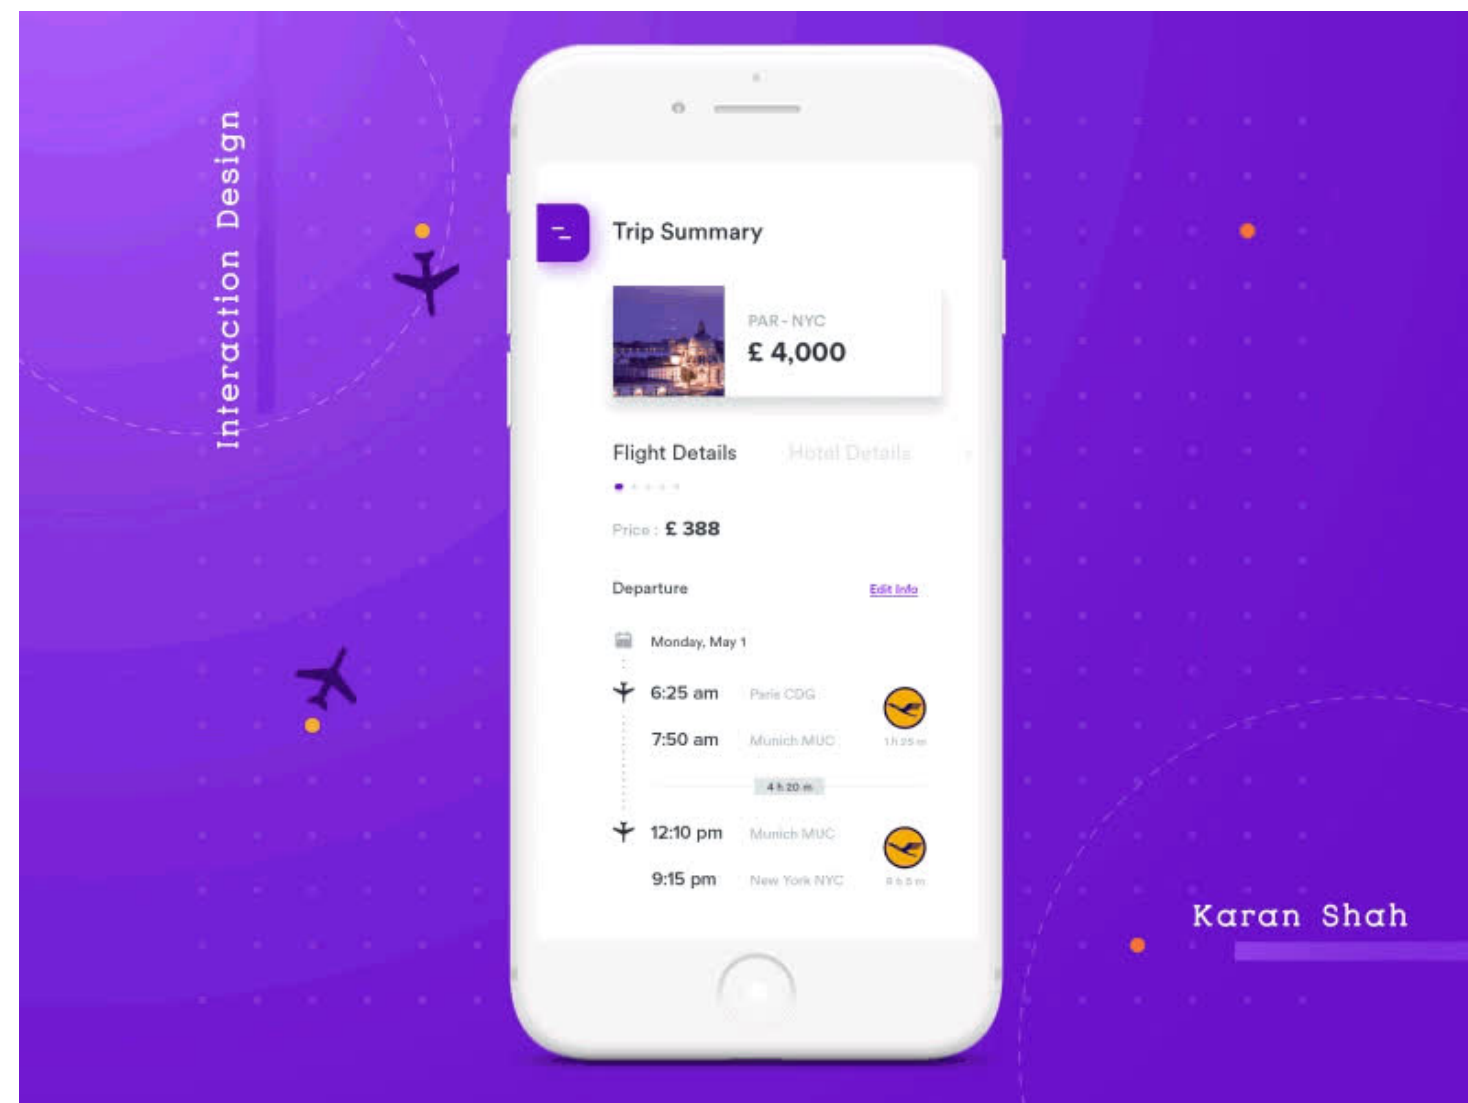

Input Controls

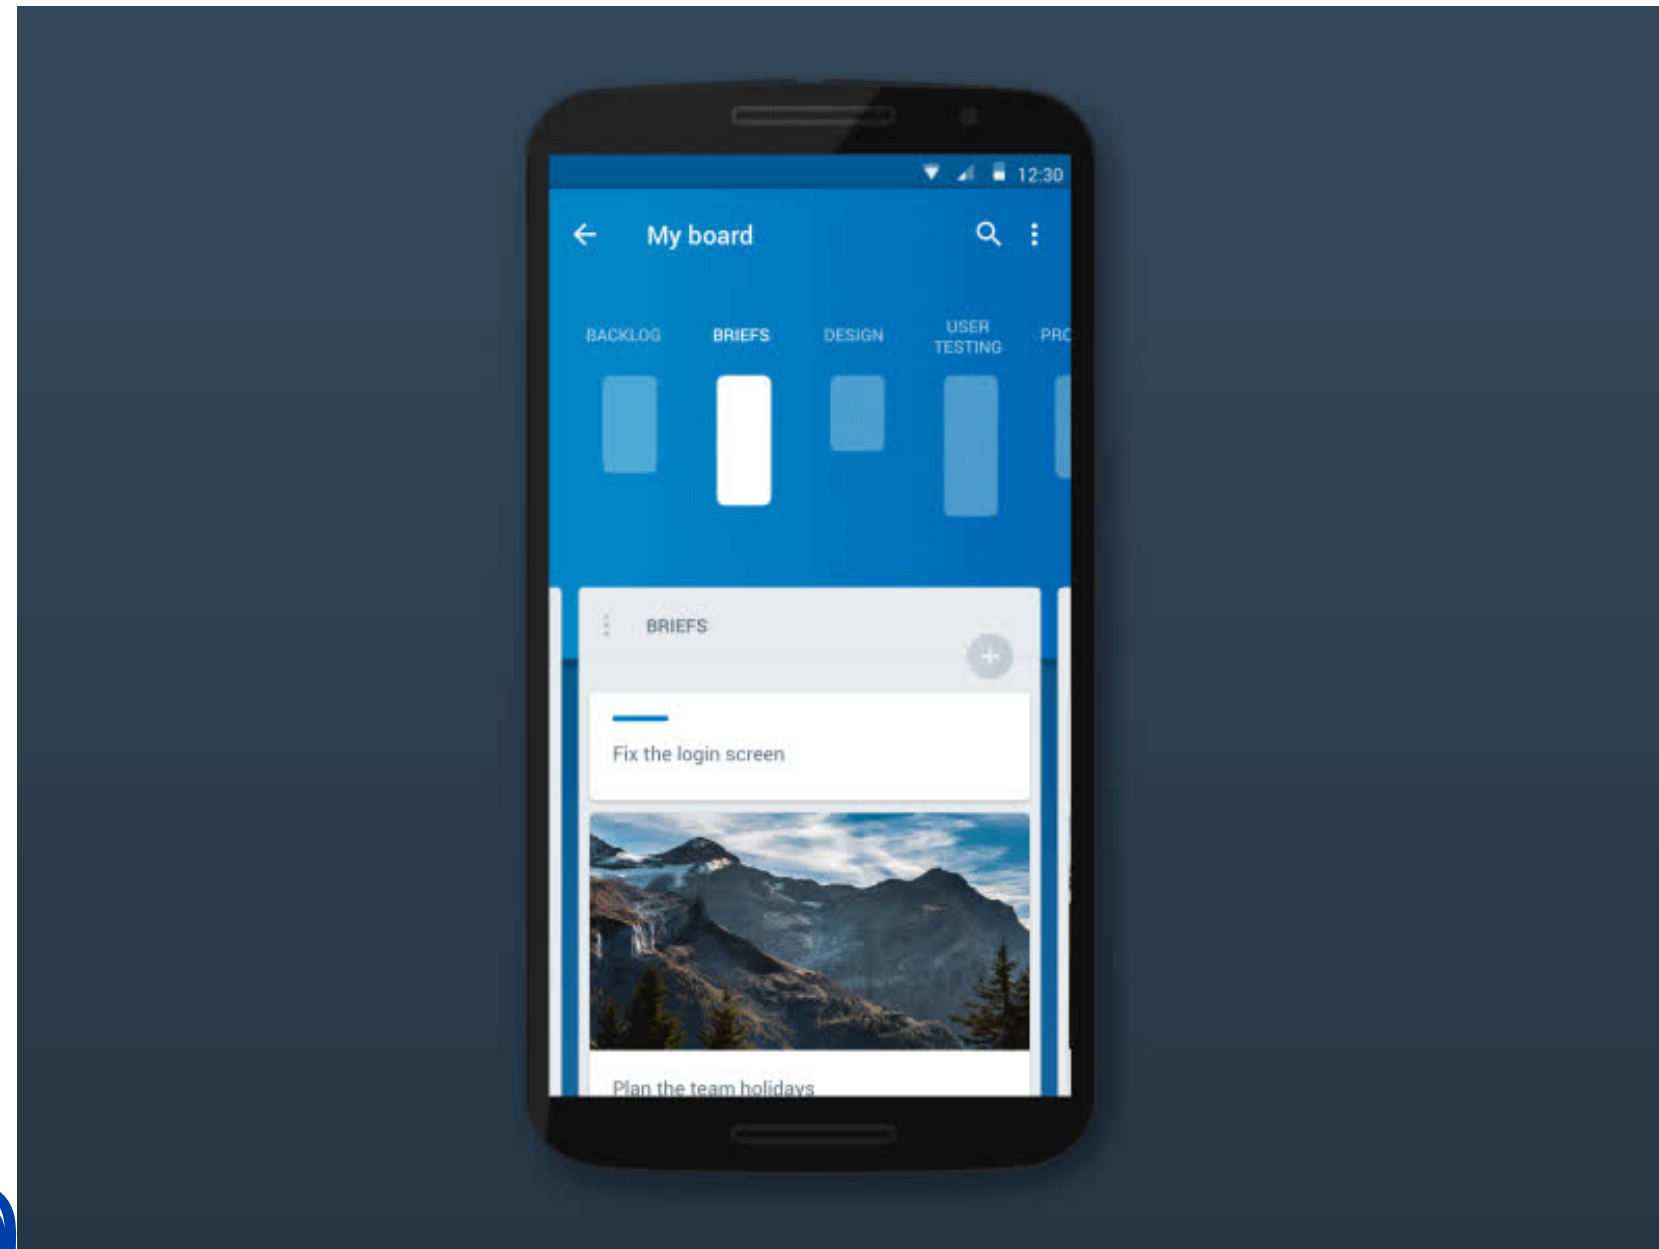

Name

Address

02. Mobile App Design Guidelines

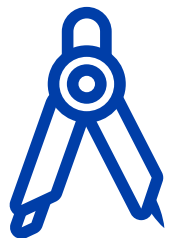

Make Onboarding Efficient

Show users the real value of your app

Declutter

Remove all things that are not necessary for the app design

Minimize User Input

Input only required information with data suggestion

Breakdown Tasks

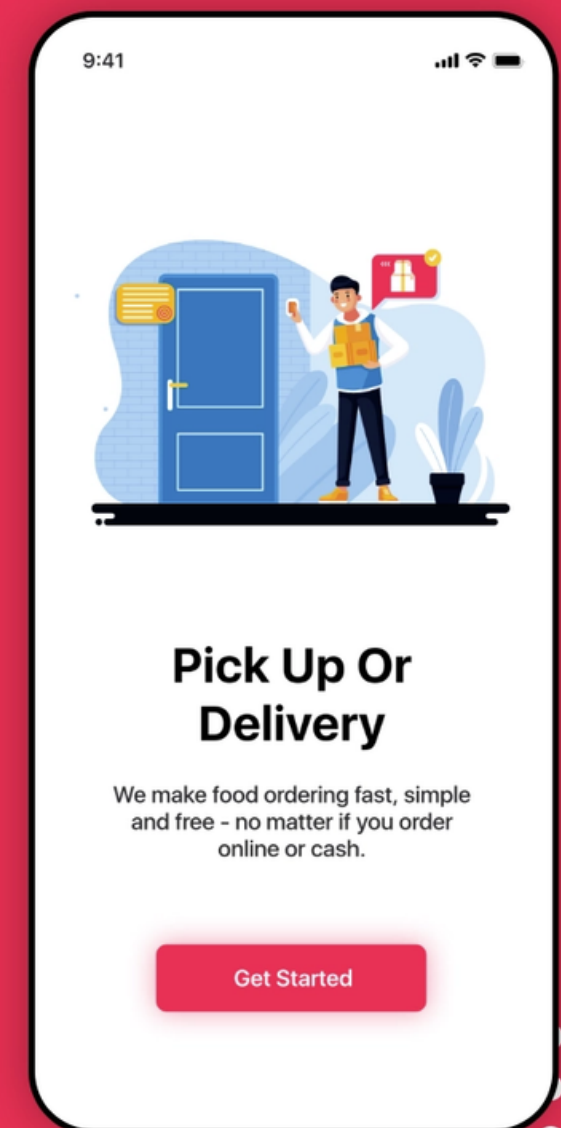

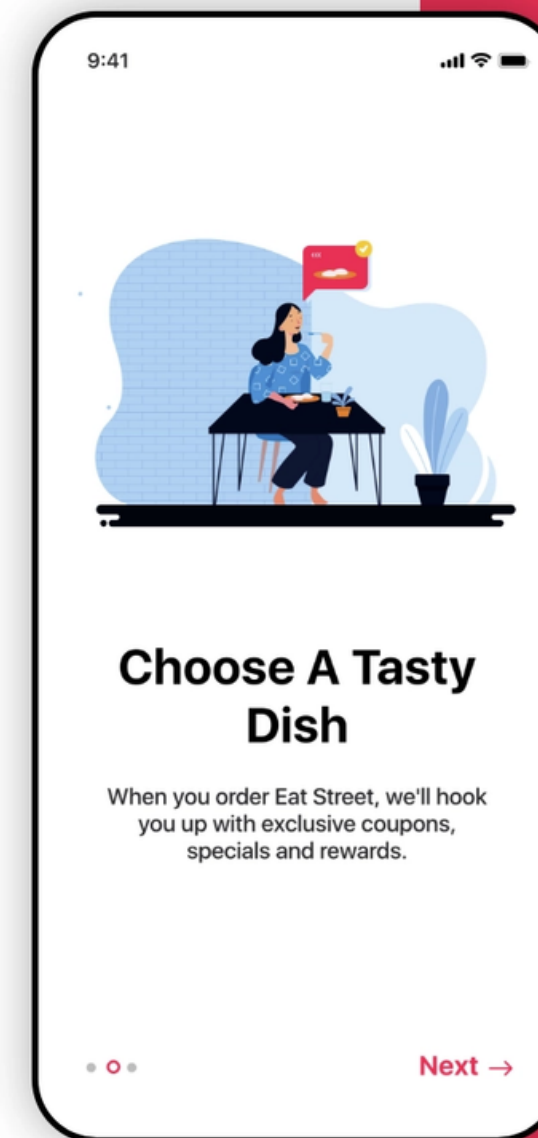

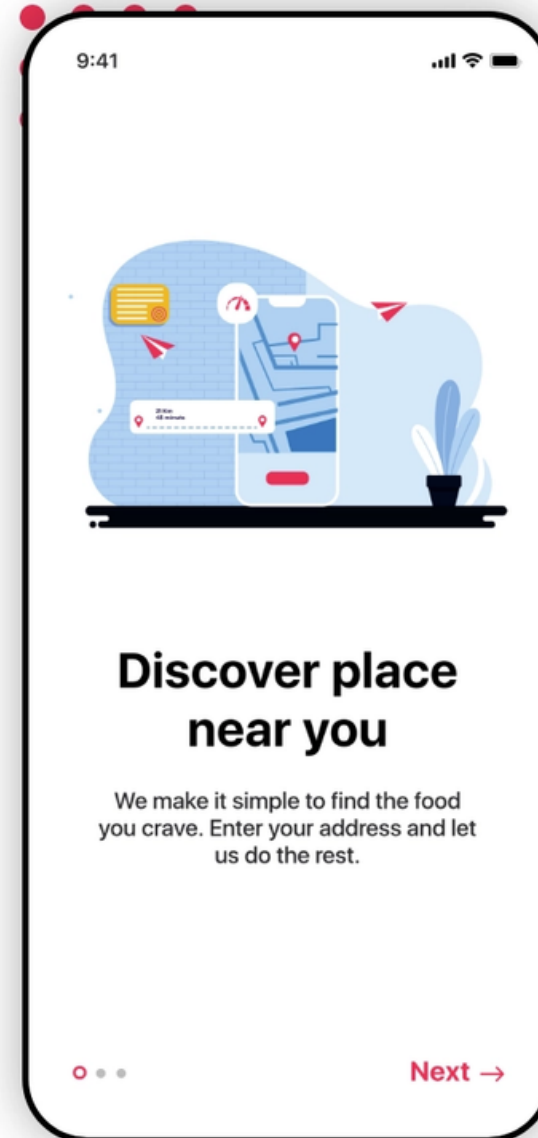

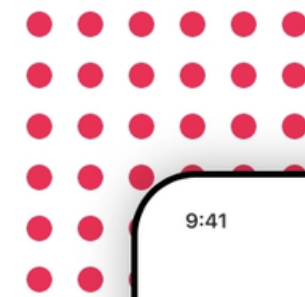

Divide large tasks into a number of subtasks.

Make Onboarding Efficient

The very first thing a user will encounter is onboarding.

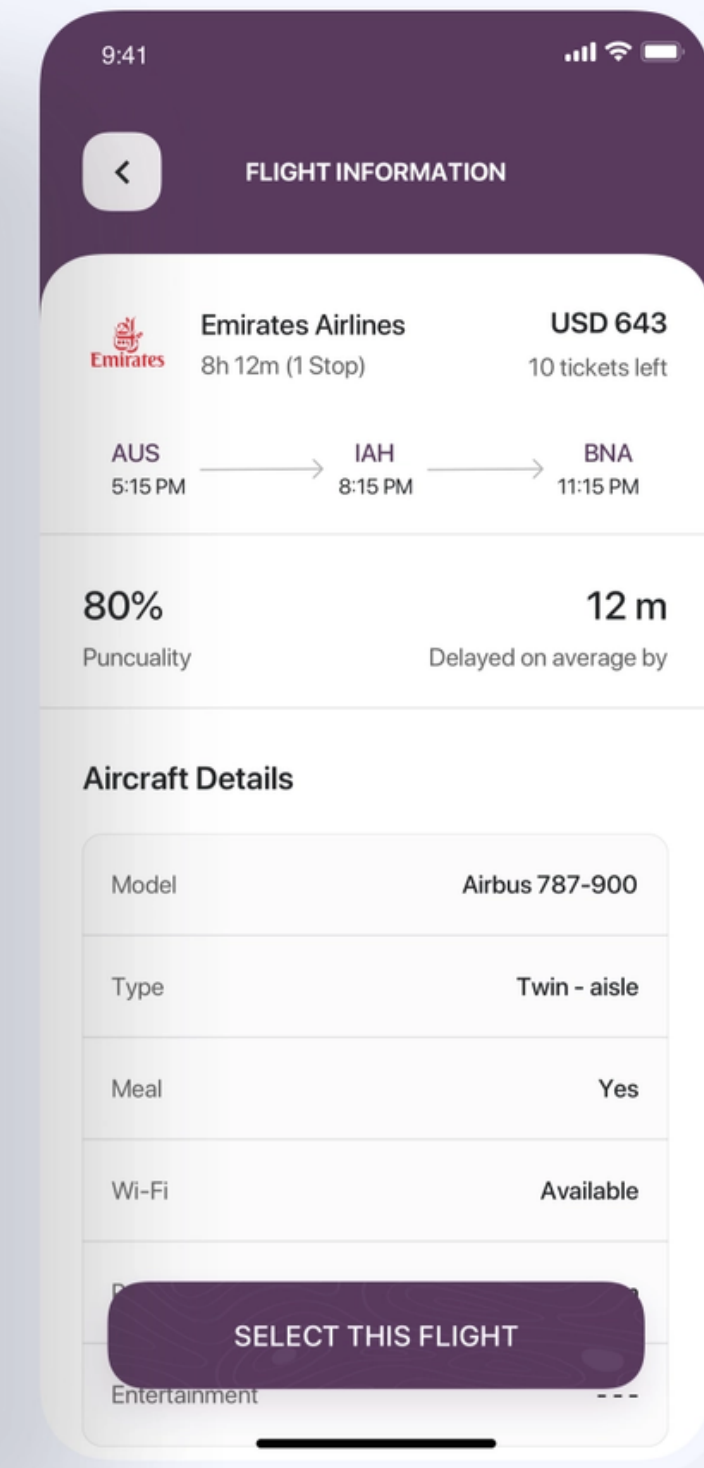

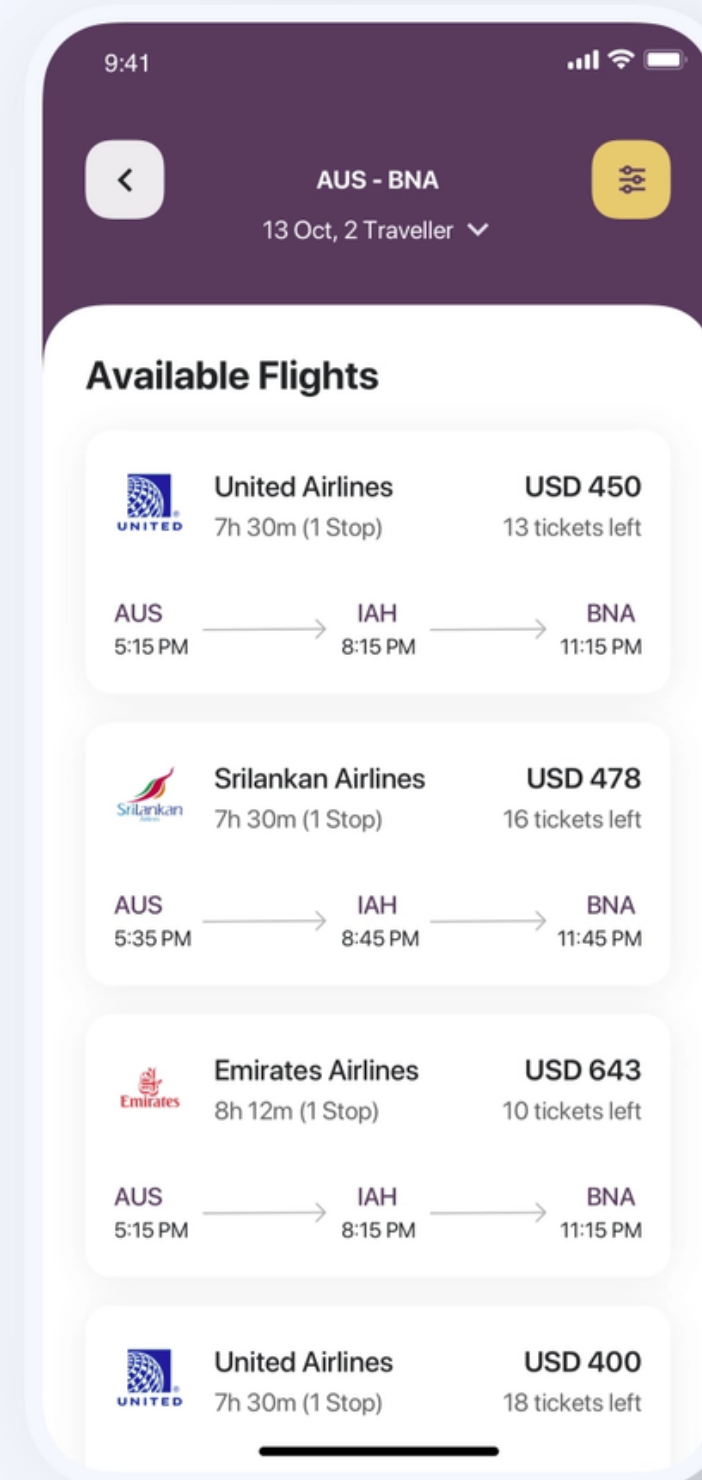

Demonstrate to users how they can perform various actions more smoothly and efficiently.

Declutter

Cutting out the clutter

- Present the user with only what they need to know
- Keep interface elements to a minimum. A simple design will keep the user at ease with the product.

Minimize user input

Keep forms as short as possible by removing any unnecessary fields

- The app should ask for only the bare minimum of information from the user.

Breakdown Tasks

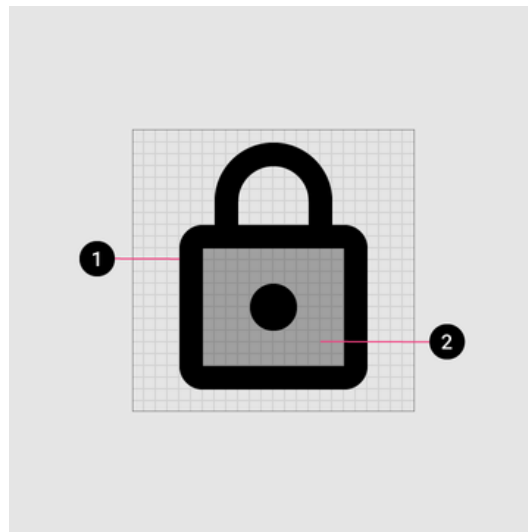

Break tasks into bite-sized chunks

- Do not create too much complexity for the user at one time.

The image displays three mobile app screens illustrating a checkout process, demonstrating how tasks are broken down into bite-sized chunks. Each screen features a progress indicator at the top right, consisting of three circles connected by a line, with the current step highlighted in green.

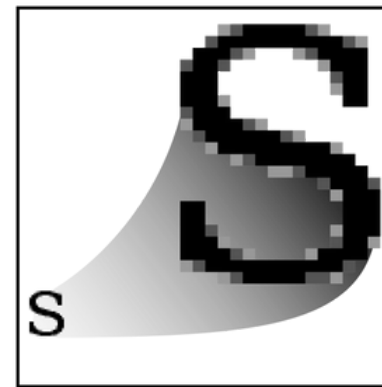

- My Bag:** Shows two items in the cart: a Sony Smart Hand Watch (X1) priced at \$149 and another Sony Smart Hand Watch (X1) priced at \$141. The total is \$290. A green "CHECKOUT" button is at the bottom.
- Address:** Shows fields for Street 1 (22/D, New Banglo), Street 2 (JJ Nagar, New Way), City (Bangalore), State (Karnataka), and PIN (887766). A green "NEXT" button is at the bottom.
- Payment:** Shows fields for Card Number (**** *00), Valid Until (05/24), CVV (***), and Card Holder Name (Jorden D). A green "PAY NOW" button is at the bottom.

03. Best Practices and Tricks

Vector Font Icons

Material Design Icons, Ionicons,

Raster
GIF, JPEG, PNG

Vector
SVG

Vector Images

SVG

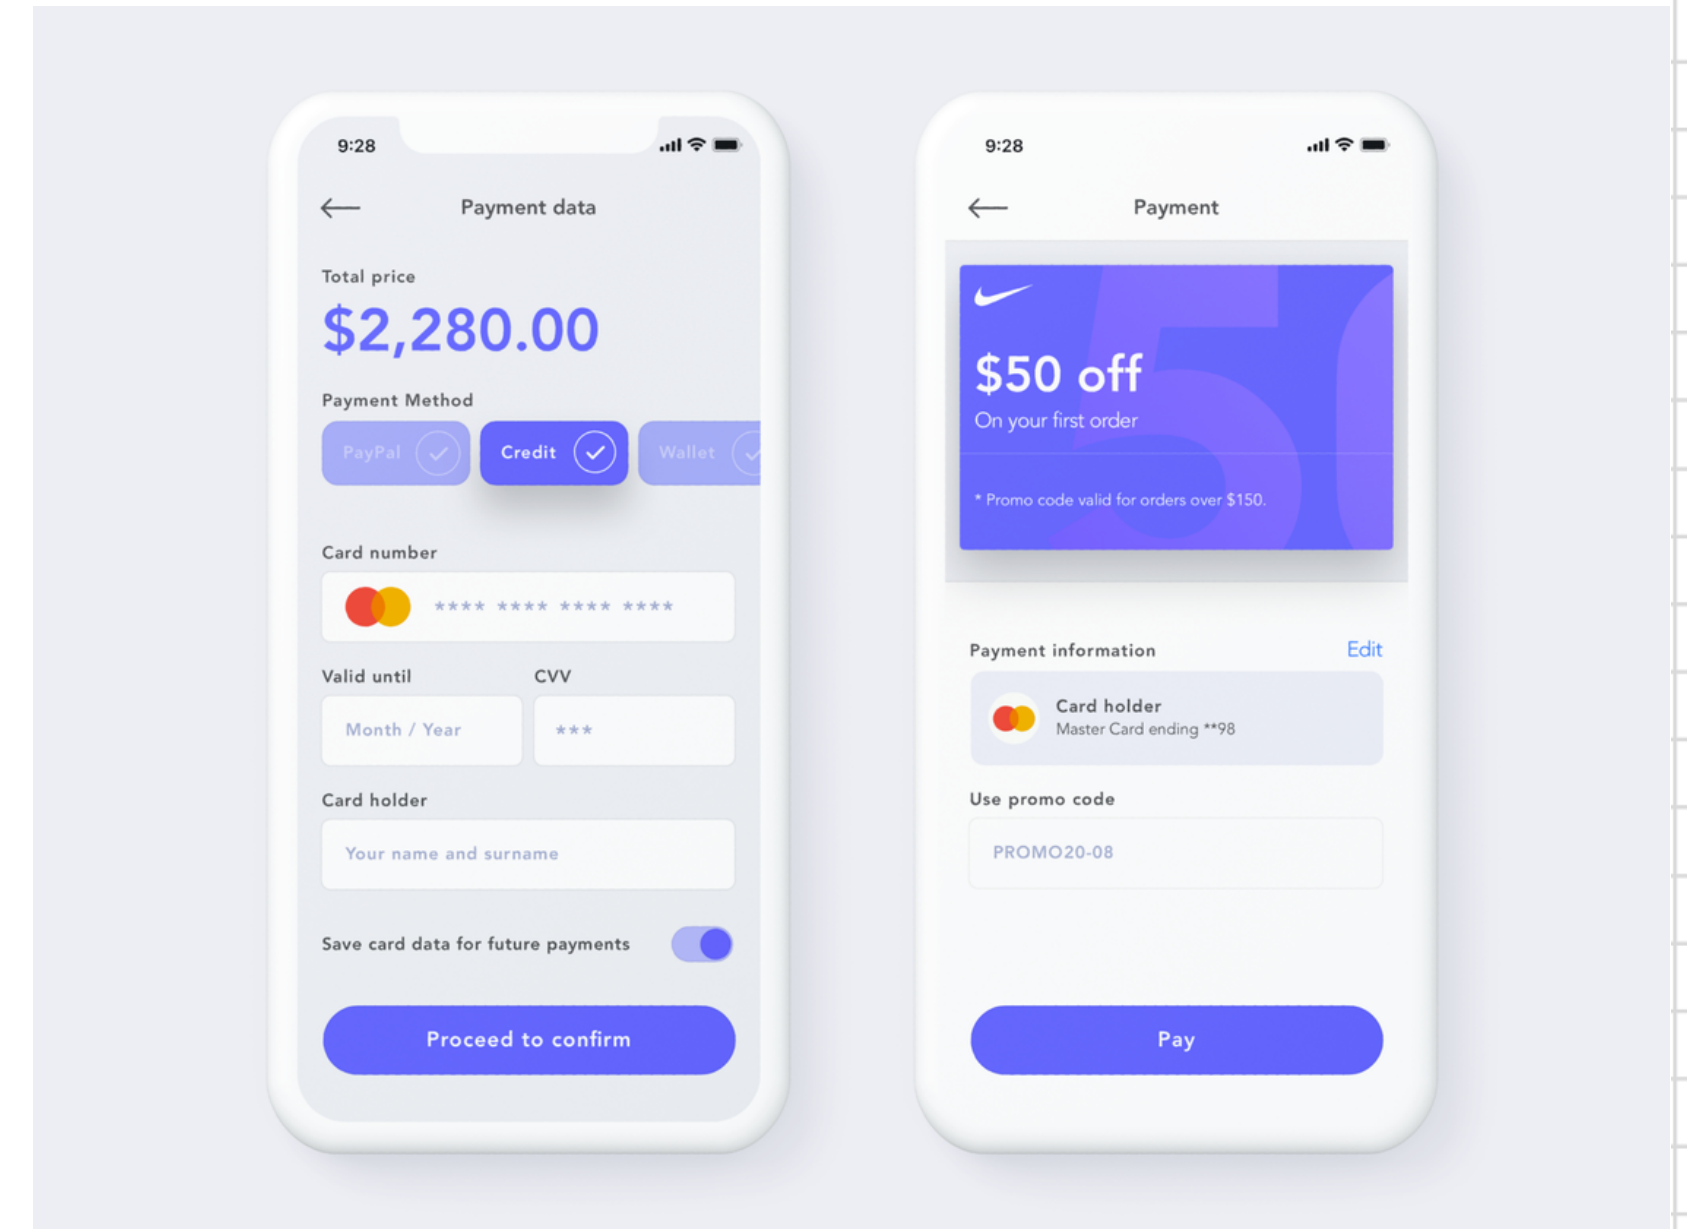

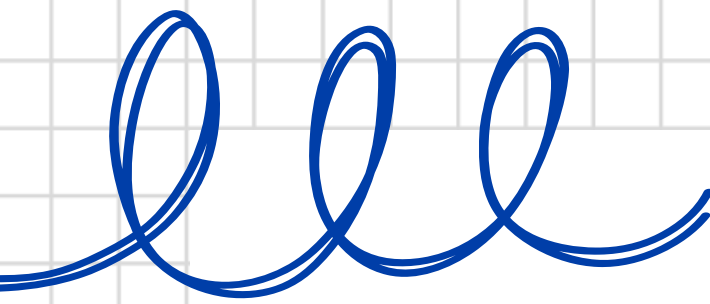

Vector Animations

Lottie

More...

- Using autocomplete & value validate
- Use familiar screens
- Customize the keyboard for the type of query
- Use visual weight to convey the importance
- Avoid jargon
- Color-blindness
- **Design for Fingers**

Any question?
